## **Extrapone® | Actipone® TCM** **Traditional & Popular Chinese Ingredients**

### **PRODUCT DESCRIPTION**

- Aqueous glycolic extracts
- Soluble in water
- Affect neither the fragrance nor the clarity of the end product
- Compatible with usual cosmetic raw materials

### **PRODUCT CHARACTERISTICS**

The knowledge of Chinese herbs originated from the earliest Chinese habitants. More than 7000 types of herbs possessing healing benefits have been documented for thousands of years. Historical records begin about 5000 years ago.

Traditional Chinese Medicine (TCM) looks at the organism as a whole. Skin, hair and nails etc. are part of it, and changes reflect the health condition of the body. TCM practitioners believe that there is a need of balance in the entire body to regain and maintain good health (holistic).

For the selection of the plants Symrise cooperated with an experienced consultant - Prof. Guixin - working at the reputed Research Center for Standardization of Chinese Medicine, Shanghai University of TCM.

### APPLICATIONS

- Surfactant-water-based products
- Emulsions
- Aqueous-alcoholic products
