- Contain a tracer: natural bisabolol
- Flowerpone®
 - Soluble in water, ethanol
 - Recommended dosage: 1-5%
- Flowerconcentrole®
 - Soluble in oil, glycols, emulsions; dispersible in water
 - Recommended dosage: 0.2-1%

The message of flowers is traditional and contemporary at the same time. Some flowers have held time-honored meanings for centuries, e.g. the red rose is THE symbol of love.

The language of flowers (also called “floriography”) was a means of communication in the Victorian era. Various flowers and floral arrangements were used to send coded messages, allowing individuals to express feelings, which otherwise could not be spoken.

APPLICATIONS

Flowerpone®

- Surfactant-water-based products
- Aqueous-alcoholic products

Flowerconcentrole®

- Emulsions
- Water-free products
