PCL-Liquid 100 No. 660089

A Unique Emollient Providing Outstanding Skin Suppleness

BENEFITS

- Shows high spreading capacity and good skin wetting properties
- Makes the skin soft, smooth and supple
- Shows water repellent properties
- Produces a thin hydrophobic film on the skin which protects from drying out
- Maintains natural water vapor permeability of the skin and counteracts occlusion
- Exhibits only very minor changes in viscosity with respect to temperature
- Has high resistance to oxidation
- Is listed in DAC (Deutscher Arzneimittel-Codex), the German Medicines Code

PRODUCT DESCRIPTION

- Mixture of branched alkyl fatty acid esters
- Molecular structure engineered according to the lipid autospreading system of water fowl
- Colorless liquid, neutral odor
- INCI name: Cetearyl Ethylhexanoate
