History

The Symrise Group originally resulted from a merger between the German companies Haarmann & Reimer and Dragoco in 2003. In December 2006, Symrise AG entered the stock market with its initial public offering (IPO) and was admitted to the MDAX about one year later.

Product Portfolio

Symrise develops, produces and sells fragrance, flavoring and food ingredients, cosmetic active ingredients and raw materials as well as functional ingredients and solutions that enhance the sensory properties and nutrition of various products. The company's approximately 30,000 products mainly come from natural raw materials like vanilla, citrus fruits, onions, fish, meat, blossoms, and a big variety of plant materials. The flavors, substances, perfume oils and sensory solutions often work as central functional components for customers' end products. These customers include manufacturers of perfumes, cosmetics and foods, the pharmaceutical industry and producers of nutritional supplements, pet food and baby food.

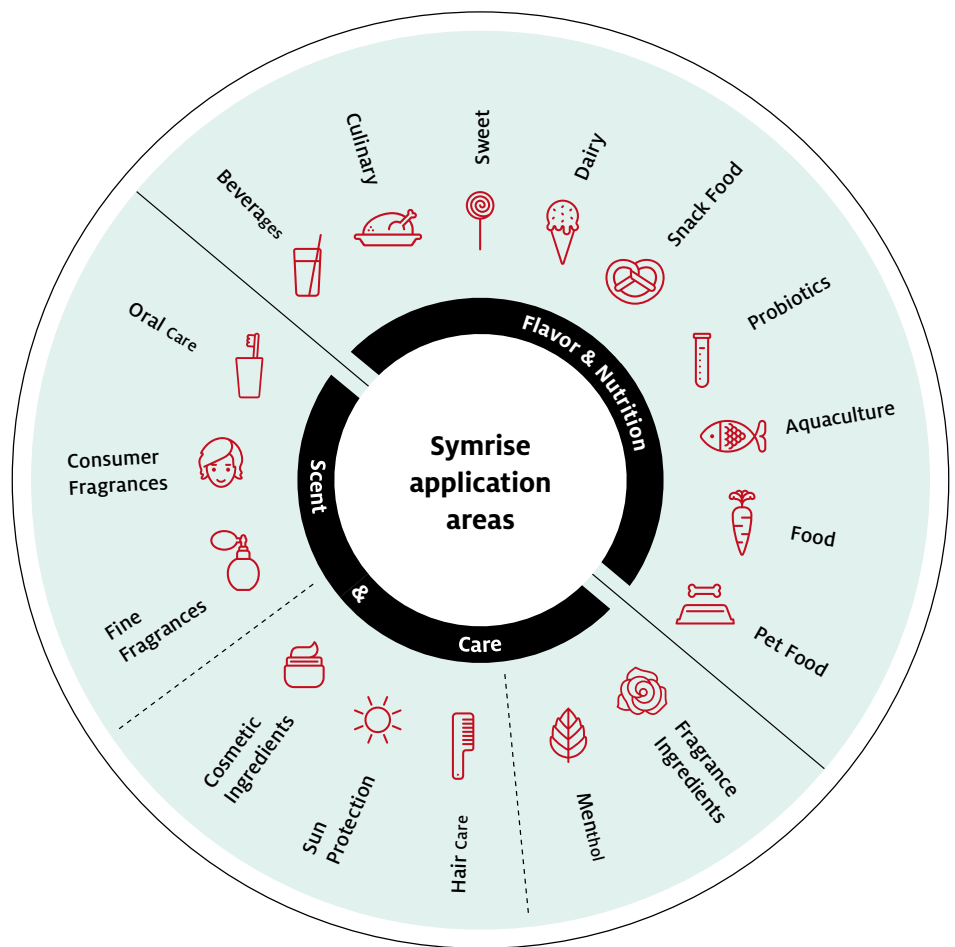

The Flavor & Nutrition segment consists of the two application areas Flavor and Nutrition.

Flavor contains the Beverages, Savory and Sweet business units. Flavor develops, produces, and sells flavors and functional ingredients for use in foods, beverages and health products. This includes culinary products and snacks, sweets and desserts, dairy products and ice cream, and beverages and nutritional supplements.

Nutrition consists of the business units Diana Food, Diana Pet Food, Diana Aqua and Probi as well as the US company ADF/IDF, which was acquired in November 2019. Diana develops tailor-made solutions from natural raw materials, which help to improve the sensorial and nutritional performance of its customers' products. This

includes sensorial and nutritional solutions to reinforce its customers' benefits in the food industry, as well as natural and functional food solutions and palatability enhancers for pet food. Another area are plant cell cultures dedicated to actives synthesis for the food, health and cosmetics industries.

The Scent & Care segment breaks down into the Fragrance, Cosmetic Ingredients and Aroma Molecules divisions. They produce and sell fragrances, cosmetic ingredients, aroma molecules and mint aromas. They are used in the manufacture of perfumes, personal care and cosmetic products, cleaning products and detergents, home fragrances and oral care products.

About Symrise

Symrise is a global supplier of fragrances and flavorings, cosmetic active ingredients and raw materials, functional ingredients and product solutions for food production based on natural base materials. Its clients include manufacturers of perfumes, cosmetics, food and beverages, the pharmaceutical industry and producers of nutritional supplements and pet food.

With sales of € 3.5 billion in the 2020 fiscal year and a market share of around 10%, Symrise is one of the leading global suppli-

ers. Headquartered in Holzminden, Germany, the Group is represented by more than 100 locations in Europe, Africa, the Middle East, Asia, the United States and Latin America.

Symrise works with its clients to develop new ideas and market-ready concepts for products that form an indispensable part of everyday life. Economic success and corporate responsibility are inextricably linked as part of this process. Symrise – always inspiring more...
