Symrise introduces SymRelief[®] green for next-generation, natural-origin intensive skin soothing

- Revolutionizes skin soothing & sensitive skincare with a natural patented synergistic complex
- Combines biotechnology-derived bisabolol and organic ginger extract to create a 100% Natural Origin Content (NOC) solution as per ISO 16128
- Competencies in natural and soothing skincare are being further expanded.

Symrise announces the launch of SymRelief[®] green, a patented cosmetic solution that synergistically combines biotech bisabolol and ginger root extract to soothe visibly and deeply sensitive skin. It provides immediate and long-lasting relief from visible irritations, decreasing the appearance of redness and increasing skin comfort. SymRelief[®] green is 100% derived from natural ingredients, helping to address the growing demand for effective natural solutions.

SymRelief[®] green aims at counteracting the underlying causes of hypersensitivity at multiple levels and preventing so-called inflammaging by protecting collagen and targeting COL17A1 (the gene involved in skin structure protection). Thus, it helps cosmetic brands meet rising consumer demand for holistic skin soothing. Formulators benefit from a cost-effective, easy-to-use solution that maintains color and odor in formulations and can go into a wide range of applications across skin and body care.

To create SymRelief[®] green, Symrise used its 70 years of expertise in bisabolol, well known for its purity and soothing effects. By combining these properties with ginger root extract's boosting effects in the optimal ratio, SymRelief[®] green decreases skin sensitivity and brings additional inflammaging benefits, while working more effectively than bisabolol alone in several aspects. Its key benefits have been scientifically validated in clinical efficacy tests. *

SymRelief[®] green can also help cosmetics brands to fulfill their responsible beauty commitments. The sustainably designed bisabolol is using biotechnology, making SymRelief[®] green a 100% Natural Origin Content (NOC) product as per ISO 16128. The solution is also biodegradable and meets vegan, halal, and kosher standards.

“We are offering a nature-powered, scientifically validated solution that provides both immediate relief and long-term protection. Also, it is aligning with consumer expectations for more natural and sustainable solutions,” says Lili Baraton Sintes, Global Product Manager at Symrise. “We are building on 70 years at the forefront of sensitive skin solutions. Now, we are taking a proud next step in our continuous development of innovative cosmetic ingredients that efficiently improve skin comfort and well-being.”

*SymRelief[®] green decreases skin sensitivity, tested at 0.1% on sensitive skin - In the recommended levels.

About Symrise:

Symrise is a global supplier of fragrances and flavors, cosmetic active ingredients as well as functional ingredients. Its customers include perfume, cosmetics, food and beverage manufacturers, the pharmaceutical industry and producers of dietary supplements and pet food.

With sales of around €5.0 billion in the 2024 financial year, the company is one of the world's leading providers. The Group, headquartered in Holzminden, Germany, has more than 100 locations in Europe, Africa and the Middle East, Asia, North and Latin America.

Together with its customers, Symrise develops new ideas and market-ready concepts for products that form an indispensable part of everyday life. Economic success and corporate responsibility are inextricably linked.
